

SPECTRO 2 SPECTROPHOTOMETER

FOR THOSE WHO
DEMAND **ADVANCED**
COLOR MEASUREMENT

THE SPECTROPHOTOMETER REIMAGINED

Our Spectro 2 runs the gamut when it comes to professional color management and color communication. Nix has taken what used to be a large stationary machine and engineered it to the size of a tennis ball. Unlock ever evolving features with the Nix Toolkit app! The Spectro 2 is also compatible with various 3rd party software programs available.

FEATURES

- Match any color with a simple scan
- Create custom color databases
- Compare two color scans
- Measure ink density
- Compatible with Pantone, RAL and NCS
- True 31 channel spectral data
- Industrial, coated, aluminum enclosure

A MUST FOR PRINT AND QA

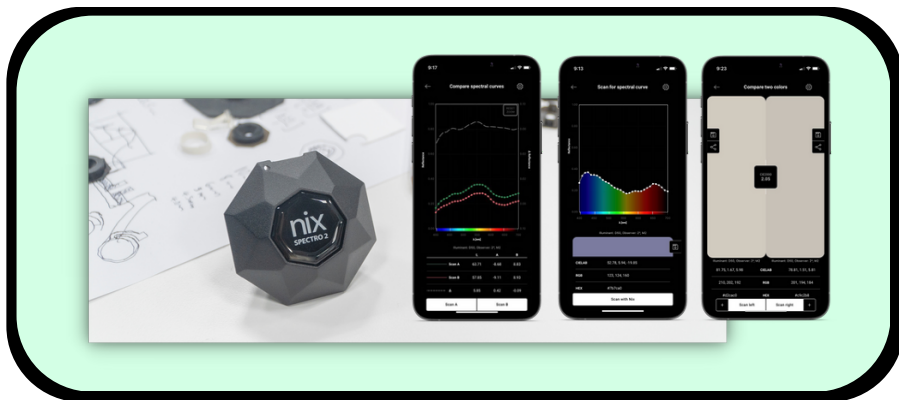

Trusted by companies across industries and around the world. Add the Spectro 2 to your workflow and effectively analyze color and perform on the spot quality checks during production.

SPECTRO 2 SPECTROPHOTOMETER

FOR THOSE WHO
DEMAND **ADVANCED
COLOR MEASUREMENT**

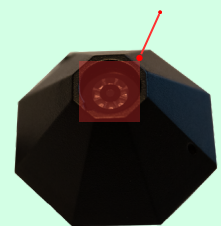

With 1 recorded scan per second, the Nix Spectro 2 has 31 channels across UV, IR and the visible spectrum giving you **unparalleled accuracy and consistent data measurements** time and time again.

No matter the condition, Nix was built for it. Get creative with how and where you perform your scans and have the confidence to know that **your spectro will withstand any condition you use it in.**

Without sacrificing on performance, we've made the Nix Spectro 2 a cost-effective option for any industry. **No longer do you have to spend thousands of dollars** to retrieve accurate data measurements.

MULTIPLE APERTURE
SIZES AVAILABLE

5MM APERTURE

2MM APERTURE

Our 2mm version spectro effectively measures control strips down to 3mm
